# How do I get started?

Register on our web-app. Instantly receive log-in credentials and start trading!

We believe that an easy-to-use application with an amazing experience allows traders to focus on what's really important.

Step 1: Register for the app

Step 2 PC: Click on the Start trading button in the top right corner of your dashboard.

Step 2 Mobile: Click on the Start Button in the menu, select start trading, choose the account type you wish to trade, sign up and receive your credentials immediately.

# Is verification required?

Yes, all traders must go through our double verification system.

First, You have to go through verification in your dashboard.

During this verification, you need to provide a valid document that is accepted by Veriff and take a picture of yourself. Thanks to this verification we can check if the account is truly used and operated by the existing person. This usually takes only a few minutes.

Then after you pass our evaluation process, you need to sign the contract of the funding account. For this account verification, we require the same documents as you have used for Veriff verification. It can be a passport, ID, or driver's license. We do not require any proof of address and Veriff also does not. This verification may take up to 24 hours.

## **A passport is recommended for the verification**

-----

*The verification is not required right from the beginning. However, you will be able to pay only with cryptocurrencies, and eventually, you will have to go through Veriff if you wish to receive a funded account.*

# Do I need a license to trade?

No, you are always trading on a simulated account so you do not need a license to trade. Just sign up and trade. If you successfully complete any of our evaluations, we will provide you with account that you can earn from. Simply sign the contract we send you with valid information and we will get you all set. However, please note that you are responsible for your own taxes in your own jurisdiction.

# How do I apply to become a Funded trader?

What's the evaluation process?

Simply choose the account type you are interested in trading, follow the steps necessary to complete the application and after we receive the payment, your account will be issued ( you will find it in your Funded dashboard) and you will get an email with confirmation.

You will have realistic account conditions in the form of low commissions and spreads. If you manage to pass all requirements in the phase one of the account evaluation, you will proceed to the second and the final phase of the evaluation and you will receive a new account for the step two and three where the rules will be significantly easier during this final stage before the funding. For a detailed explanation of the rules, please visit the [Trading Objectives and Rules](#) site.

# Why do you work with traders?

Reasons why we put our trust in aspiring traders.

We are searching for traders to work with us worldwide so we can build competitive trading systems using the data. Our main goal is to serve clients and provide them with an access to education through simulation and opportunities to earn with a user-friendly experience that isn't widely available elsewhere. We have created account parameters that keep the trader focused on a discipline and our Funded Dashboard applications and tools are designed to guide our traders to become the best traders they can be. We believe that trading is the ultimate form of freedom, but just like anything else, attaining this ultimate freedom requires a plan with rules and discipline. We have provided these rules for you, along with the opportunity to trade and earn if you can master your strategy and hone your skills. Keep focused and pursue the life of your dreams.

# Can I try Funded for Free?

Yes of course! We feel that it is important to show traders what we can offer them. Simply create an account with us and request our try before you buy an account to see what it's like trading \$100,000 on our MT4 accounts with simulated live market conditions. You will have access to our Funded dashboard and all the features we offer. We allow traders to use the applications they will have access to and test trading conditions they will be working with during the evaluations. Please note that no performance generated during the trial accounts will be applied to evaluations and no profits are eligible for pay-outs.

# Why should I apply for the Funding program?

Trading can present significant difficulties, and conventional traders are often confronted with a range of challenges. These include attempting to achieve substantial profits with limited capital (known as undercapitalization) and the fear of losing one's own funds, which can create additional pressure. Furthermore, psychological pressures can arise from the desire to achieve unrealistic returns, while a lack of discipline and established rules can impede growth.

By becoming a member of the Funded community of traders, however, individuals can gain access to superior technology and analytics, and other benefits without risking their own capital. This elite group of forex traders enjoys an esteemed reputation and the potential to earn a trading account that pays them for good performance through the Program. Traders retain 80% of all profits generated on their account. In addition, the initial fee paid is refundable upon the first payout from the Account. Unlimited potential exists for those who possess the necessary skills and drive to succeed.
